

The purpose of this campus kick-off is to

- Share U-M's local and national plans
- Connect with campus
- Promote awareness and involvement in all areas of green computing
- Introduce committee leaders
- Outline overall benefits of the Climate Savers Computing Initiative

Growing Greener Computing Practices

The Climate Savers Computing Initiative is a great opportunity for the University to leverage its resources, establish itself as a national leader, conserve natural resources, and significantly reduce carbon dioxide emissions. It's essential for the campus community to work together in order to make an impact; your involvement is key.
