

## **President's Commission on Carbon Neutrality**

### Co-Chairs Summary of Commission Meeting February 22, 2019

The meeting opened with President Schlissel giving the charge to the Commission to begin its work on carbon neutrality. He stressed the importance of the objectives of the Commission as set forth in the Charge document, and the commitment of the university to ensuring that we meet the goals set forth in the objectives. He reminded the Commission that its purpose was advisory, to recommend actions that will lead to meeting the university's goals. The university administration and the Board of Regents' duty will be to act on those recommendations in a responsible manner, balancing the top priorities of the university, which include setting and meeting goals for carbon neutrality. President Schlissel reviewed the scope of the Commission which includes all three campuses (Ann Arbor, Flint and Dearborn). President Schlissel also reiterated the university's commitment to and expectation of achieving the 2025 goal of a 25% reduction in greenhouse gas emissions from a 2006 baseline, and charged the Commission with focusing its efforts on the path forward beyond 2025.

After President Schlissel departed, the Commission members introduced themselves to each other, describing their backgrounds, relevant areas of expertise, and interests in working to achieve the Commission's objectives.

This was followed by the co-chairs setting forth the responsibilities of the Commission members as the work proceeds, and a discussion of the initial focus of work. Topics to be addressed over the next few meetings will include formation of the advisory panels and exploring the scope of the Commission's work, which will include briefings on how emission scopes are defined and familiarizing members with the baseline, history and status of UM efforts to date.

The Commission suggested and agreed to host a first public "Town Hall" session as soon as possible to gain additional input from the broader stakeholder community.
